

Addendum # 1

Questions related to RecycleSmart SB 1383 Route Monitoring Assistance

RFP issued June 1, 2023

1. Can proposers include exceptions to the standard agreement within their Statement of Qualifications? If so, is there a particular location we should include them?
 - a. Yes, proposers can include exemptions to the standard agreement in the proposal response. Please create a Section F and state your exceptions there.
2. Does Republic Services plan to add any new routes beyond the 69 routes listed in Attachment B, Final Report, Section 3.0 on page 3?
 - a. No.
3. The RFP states that the selected consultant can use “similar technology to capture field work,” instead of Recyclist Mobile App. Would you recommend the use of Recyclist Mobile App?
 - a. RecycleSmart does not recommend the use of one technology over another. The proposer’s technology must have the capability to transfer the required information to Recyclist for tracking purposes by RecycleSmart and Republic Services.
4. Is the anticipated project cost of \$50,000 expandable?
 - a. Proposers may provide new and innovative approaches and tasks that go beyond the scope of the RFP, with an associated budget that could be added at the discretion of RecycleSmart, but the proposal must respond to the scope of the RFP at a minimum, and the basic scope must not exceed the stated project cost of \$50,000.
